Summary of Qualifications

- 8 years of experience in **Analyzing, Designing, Documenting, Developing, Testing and Deploying** web and "mobile web" applications using **HTML5, CSS3, Bootstrap, Java Script, jQuery, AJAX, JSON** Including of **Asp.net MVC** development using **Web API, C# and ReactJS, Angular**.
- Experience in working with **RESTful Web Services** and implementing **RESTful API's**.
- Good experience on customizing **CSS frameworks** like Bootstrap and Foundation using **CSS pre-processors LESS or SASS** and Compass.
- Dedicated **UI/Front - End** Developer experience in **Single Page UI** (User Interface) application design and development.
- Expert in Using **CMS's (WordPress, Joomla, Drupal, Magento)**
- Hand experience in **E-commerce open sources (OpenCart, PrestaShop, Shopify, Ecommerce)**
- Implemented easy to use Bootstrap plugins for building a carousel, accordion, modal windows etc.
- Solid experience with Responsive Web Design (RWD) using Bootstrap, Foundation and SASS.
- Used SASS and LESS CSS pre-processors for converting to old-fashioned CSS.
- Experience in taking performance optimization measures for website/web applications to reduce the response times and hence enhancing the end user experience.
- Hands on experience in Coding, Testing, Implementation/Maintenance Support in **PHP and MySQL**.
- Experience in Version Control tools like **GIT, SVN**, and Clear-Case for Source Code version management.
- Built custom CSS using CSS Background, CSS Positioning, CSS Text, CSS Border, CSS Margin, CSS
- Expertise in debugging and troubleshooting existing code using **Firebug**, and **Developer Tools**.
- Highly motivated, reliable analytical problem solver and troubleshooter with strong attention to detail.
- Quick learner and proficient in solving the technical issues in the project.
- Followed Waterfall and **Agile/Scrum** methodology of software development, which satisfies the customer through the early and continuous delivery of valuable software.

Technical Skills: *HTML5, CSS3, Bootstrap, JavaScript, jQuery, ASP.NET MVC, C#, Web API, ADO.Net, Razor View engine, MySQL, XHTML, AngularJS, ReactJS, Node.JS, AJAX, JSON, WampServer, XAMPP*

Tools: *Visual Studio, WebStorm, Adobe Dreamweaver, Sublime, Git, TFS, SVN, WordPress CMS, PhpStorm, Magento, Shopify, Atom, Grunt, Firebug, Drupal, Adobe Photoshop, Illustrator, Adobe Indesign, Sketch, UxPin, Invision, Balsamiq, Justinmind.*

Professional Experience

Client: Microsoft Corporation, Redmond, WA

June 2018 – Present

Role: Front-end Developer

Product: Office 365 & OSP Office

Description: Labels in Office 365 can help you take the right actions on the right content. With labels, you can classify data across your organization for governance, and enforce retention rules based on that classification. With labels, you can Enable people in your organization to apply a label manually to content in Office 365 group. Also, I work on the project **OSP Office** which is developed in **ReactJS** that enables users to identify their eligibilities.

- **Office 365 Labels:** Currently developing a workflow automation which replaces the existing manual process of creating and assigning policies and labels to the tenant users in a compliant manner.

- Specifically, creating **PowerShell** scripts and **C#** library to help automate the manual process.
- Developed PowerShell scripts for **CRUD** operation on labels to the tenant admin, allowing the admin to assign the labels to its tenant users.
- Debugging test cases including debugging PowerShell cmdlets and **WCF services**
- Creating policies under the tenant using PowerShell scripts and publishing them to the portal, where admins can see and assign policies to an individual/group of users.
- Implemented an automation test case for a label creation. The script will be run from PowerShell.
- **OSP Office:** Designed and developed various Web forms using **HTML, CSS, Bootstrap** and **JavaScript, React.JS**
- Developed user interface by using the **React JS, Flux** for **SPA** development.
- Created **components** using **recat.js** and created documentation for components
- Used **React-Router** to turn application into **Single Page Application**
- Worked with **HTML5, CSS3, JSON, JavaScript, ReactJS** and **ES6** for developing **user interface**.
- Experience in using Bootstrap which can easily manipulate modal windows alerts, tooltips, scroll spy, Pop over, button, type head, etc.
- Designed and developed base classes, framework classes and **re-usable components**.
- Developed Date Time Picker using **JavaScript library** extensively.
- Component for UX-Library consisted of Button, Checkbox, Input, Icons, Toggle Button, Dropdown, Multi-Level Dropdown and many more.
- Experience in using **GIT** for pulling and committing the developed content from/to the **GIT repository**.

Environment: PowerShell, C#, Visual Studio 2017, Torus, Control Plane, Substrate, ReactJS, Node.js, Bootstrap, GIT, Jira,

Client: Delicia, San Antonio, Texas (<https://delicia.io/>)

Jan 2018 – May 2018

Role: Front-end Developer

Description: This project is for complete web user experience for a start-up called Delicia. Delicia is a decentralized food network that provides affordable quality food to people at their own locations while enabling restaurants and food retail outlets to aggressively reduce food wastage.

- Implemented a responsive design structure to ensure improved web and mobile user experience using the Bootstrap framework, **jQuery, JavaScript, HTML, CSS**.
- Used **Bootstrap** and **AngularJS** UI to make the application user-friendly in the development of the Navigation Bar, Tables, Sliders, Widgets etc.
- Created AngularJS components implemented Interpolation, Input variables, Bootstrapping, NgFor, NgIf, Router Outlet, binding the click event, Component decorator, binding to the hidden property.
- Also implemented Graphs and Charts with animation using **JavaScript Library** to represent survey data for Analytics application.
- Performed Client-side validations using **JavaScript**.
- Used bootstrap tables and grids for displaying data on the UI.
- Created Test Cases and performed unit test using the JavaScript testing framework **Jasmine** and **karma**.
- Implemented scrum-based **agile** software development for analyzing, designing, and developing applications.
- Developed custom **CSS** style sheet on **LESS** compiler incorporated its dynamic features such as variables, operations, and functions.

- Enhancing the system to improve user experience and developed functions to acquire data using **RESTful**.
- Developed the application for responsive to different screen resolutions using Bootstrap and CSS media queries

Environment: Bootstrap, Angular, JavaScript, jQuery, Adobe Photoshop, Adobe InDesign, Adobe Dreamweaver, FileZilla, WampServer, Jasmine, Karma, Grunt, RESTful Webservice, GIT.

Client: Microsoft Corporation, Redmond, WA

Jan 2017 – Nov 2017

Role: Front-end Developer

Product: CodeHub

Description: CodeHub is a platform to find or share code components and related information which encourages reuse rather than rewrite. I worked on the design of the Core User experience for this internal website used by more than 50000 employees at Microsoft actively.

- Designed dynamic and multi-browser compatible pages using **HTML, CSS, ASP.NET MVC** and **JavaScript** Confidential and developer responsive interface using **Bootstrap** and used **CSS**
- Implemented CRUD APIs using **Asp.net web API** in **C#**.
- CodeHub End to End Design. Creating **mocks, sprite images** and cross-device implementation.
- Responsible for creating **RESTFUL Web Services** to serve data to the front-end application in **JSON** format.
- Responsible for Page layouts, Navigation and presented designs and concepts to the clients and to the management for review.
- Polling of shared **GIT** repos to index in an **Azure** search using **C#**.
- Also implemented fluid search results using **jQuery (AJAX)** and **Web API** and implemented Visual Studio Team services extension for Code Hub using **VSS SDK**.
- Developed an 'iframe' based solution to maintain browser back history.
- Also Involved to create different cross-browser compatible user interactive web pages, using web technologies like HTML5, XHTML, and CSS3.
- Developed cross-browser/platform pages using CSS3 **Media Queries** and **JavaScript** to match design specs for complex page layouts while adhering to code standards.
- Utilized various **JavaScript** and **jQuery libraries, AJAX** for form validation and other Interactive features.
- Used **GitHub** for source control.

Environment: ASP.NET C#, WEB API, JSON, MVC, Angular JS, GIT, Visual Studio 2017, Bootstrap, JavaScript.

Client: Seg Technologies Pvt Ltd, Hyderabad, India

Aug 2015 – Dec 2016

Role: Front-end Developer

Project: Crower - www.crower.com

Description: Crower website is an e-commerce website for camshafts, connecting rods and valve train components using **Magento** community edition.

- Develop corporate e-commerce system using **Magento** Enterprise as the main platform.
- Implemented a responsive design structure to ensure improved web and mobile user experience using the **Bootstrap framework, jQuery, JavaScript, HTML, CSS**.
- Worked on back-end development and maintenance of websites using **PHP** and **MySQL** and integrated **PayPal** payment gateway.
- Convert static design wireframe to Magento template/theme using responsive design.
- Developed client-side validation code using JavaScript and jQuery.
- Involved in coding pages with best Search Engine Optimization (**SEO**) techniques.

- Maintained Linux server with Apache, MySQL, PHP and other hosting stuff.
- Highly involved in making updates to the current website and simultaneously handling other projects.

Environment: Magento, PHP, MySQL, Bootstrap, JavaScript, jQuery

Client: Sanctify Technologies, Hyderabad, India

Jan 2012– July 2015

Role: Partner and UI Developer

- Interacting with the Client & Understanding requirements.
- Giving efficient time lines for the project based on requirement.
- Preparing HLD (High Level Design) and LLD (Low Level Design)
- Designing **wireframes / layout**, UI for achieving Customer/user Friendliness
- Development of reusable code.
- Development and implementation of Core functionality and support tools.
- Understand the business and functional requirements
- Handled the **CMS WordPress, Joomla, Drupal, Magento** (Front End programming)
- Iterative testing and code reviews through development of the application.
- Developing the system **Unit & Integration Testing & debugging.**
- Hands on experience in Coding, Testing, Implementation/Maintenance Support in **PHP** and **MySQL**
- Developing **PHP, HTML, CSS, JavaScript, jQuery** ecommerce application pages according to project requirements.
- Worked with **MySQL** which includes configuration, query optimization, full-text search indexing.
- Used jQuery for creating various **widgets**, data manipulation, data traversing, form validations, implementing **AJAX** features for the application.

Projects: (<http://www.dorinventions.com/>), (<http://suvidhasafety.com/>), (<http://volio.net/>), (<https://creditseva.com/>), (www.orienspectra.com),(www.daakshya.com)

Environment: PHP, WordPress, Joomla, Drupal, Magento, Bootstrap, JavaScript, jQuery, Adobe Photoshop, Adobe Dreamweaver

Client: Bluecom Technologies India Pvt Ltd, Hyderabad, India

Jan 2008 – Nov 2011

Role: Web Designer

- Designed logo, custom apparel design with latest Adobe CS6 Photoshop and Illustrator
- Web consulting, creating wireframes, testing CMS prototypes.
- Collaborated with the promotional, sales team and clients to build outdoor and print graphic ads using Photoshop, Illustrator and InDesign.
- Working on User-Centered Design, Visual Design, Graphic Design, Creative Design and User Experience
- Developed end-to-end designs for the web interfaces, reporting, and analysis components of projects

Project: TS EVENTS (www.tsevents.in), Lorven Interior (www.redhosting.in/lorven/index.html), Great British Granite (www.greatbritishstone.com)

Environment: HTML, CSS, JavaScript Library's, jQuery Library's, Adobe Photoshop, Adobe Dreamweaver

Education

- Computing and Software Development at LWTECH **2016 – 2017**
- Master's from University of Hertfordshire, UK **2010 – 2011**
- B.Tech. in Engineering, Jawaharlal Nehru Technological University, India **2003 – 2007**
